

Faiz Ishak Jamal

Forward Deployed Engineer Intern

Coimbatore, India | faizjamal1306@gmail.com | +91 63803 33437 | LinkedIn | GitHub | Portfolio

Education

Sri Ramakrishna Engineering College

Bachelor of Engineering in Computer Science and Engineering

2023 - 2027

Coimbatore, India

Work Experience

Software Development Intern

Dec 2025

Benchmark, AI / Backend Engineering

- Built an **AI-powered legal drafting sandbox**, using **LLM API integrations** to help users draft, refine, and iterate on law-related documents through an interactive backend-driven workflow.
- Designed the **data model** (database schemas), **backend services**, and **API integrations** for document-generation workflows with a modular architecture, shipping every change through **Git-based code review** in a startup team.

Full Stack Development Intern

Sep 2025 - Oct 2025

Nexoris Solutions, Node.js, Express.js, MVC

- Built **backend** routes, business logic, and reusable **authentication and authorization** modules for production-style web applications using **Node.js**, **Express.js**, **REST APIs**, and MVC architecture.
- Debugged** issues across the request path (routing, business logic, authentication, and **persistence** layers) and wrote the fixes to improve maintainability and **reliability**.

Projects

Eko.aiV2: Voice Booking Assistant | GitHub

React, Vite, Vapi.ai, Google Calendar API

- Built a **full-stack**, real-time AI voice receptionist for a dental-clinic workflow using **React** and the Vapi Web SDK, with **2 Google Calendar tools** (API integrations) for availability checks and event creation.
- Enforced deterministic business rules: **30-minute slots**, **09:00 to 18:00 IST**, next-slot fallback on **failure**, and name/email confirmation before booking, with a live transcription and call-state **interface**.

ClipForge: Agentic Video Automation Platform | GitHub

Python, FastAPI, LangGraph, PostgreSQL, Redis

- Designed and built a multi-node LangGraph **architecture** (transcript analysis, viral-moment detection, editing blueprints, validation, execution) that turns long-form content into short-form videos.
- Built async **FastAPI** services covering **requests, state, and storage**: **WebSocket** monitoring, **PostgreSQL** persistence, **Redis** state coordination, plus **failure** fallbacks, rate limiting, and input sanitization.

Project ASTRA: Agentic AI Investigation Platform | GitHub

Node.js, Zoho Catalyst, QuickML, React, D3.js

- Team project for the **Karnataka State Police Datathon** (a government police use case); built a **5-stage Kannada voice pipeline** (STT, translation, LLM/RAG, translation, TTS) on QuickML using GLM 4.7 and Qwen 3.6.
- Built the multi-agent Planner running Search, RAG, and Summary agents **concurrently** to fit a **30-second serverless limit** on Zoho Catalyst **deployment**, plus a RAG backend with a semantic query rewriter.
- Delivered explainable-AI answers in a **React** frontend with clickable source citations, D3.js visualizations, jsPDF reports, and synthetic case data generated with Python Faker.

SpotifyCares: AI Customer Support Agent | GitHub

Python, RAG, LLM Classification, LLM-as-Judge Evals

- Built intent classification, retrieval, and grounded responses (**k-ablation**), plus an **LLM-as-judge eval calibrated against human labels** and a **failure analysis** of where the agent breaks.

Skills

Languages: Python, Java, JavaScript, C++, SQL

Backend / APIs: Node.js, Express.js, FastAPI, Spring Boot, REST APIs, WebSockets, Asynchronous Programming, Authentication, Rate Limiting

Frontend: React, Next.js, Vite, Tailwind CSS, D3.js

Data / Storage: PostgreSQL, MongoDB, Redis, SQLAlchemy, Mongoose, Data Modeling, Database Schema Design

Cloud / Deployment: Docker, Kubernetes, CI/CD, Git, GitHub, AWS (Cloud Practitioner), Oracle Cloud Infrastructure, Zoho Catalyst

AI Tools / LLM: AI Coding Tools (Claude Code, Cursor), LLM API Integration, RAG, Tool Calling, LangGraph, Multi-Agent Orchestration, Voice AI

Engineering: Full-Stack Development, System Architecture and Trade-offs, Production Debugging, Code Reviews, Reading Documentation, Data Structures and Algorithms, OOP

Achievements & Credentials

- Hackathons:** Finalist, Mumbai Hacks 2025 (GenAI Hackathon); Prefinalist, OpenAI Academy x NxtWave Buildathon; 2nd, SREC Coin Design Challenge 6.0; 3rd, SREC AI Vishwaguru; **Open Source** Contributor, Open Source Connect 2026; research paper "Human Emotion Identification Using Brain Waves and Facial Images," ETMIS 2025.
- Amex Codestreet Hackathon 2026:** co-designed **DisputeIQ**, an agentic chargeback resolution system (2 advocate agents + neutral arbiter via Go scatter-gather, **21 Amex reason codes**, 0.85 confidence gate).
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional; AWS Cloud Practitioner Essentials (Dec 2025); JPMorgan Chase & Co. Software Engineering Job Simulation via Forage (Kafka, H2 Database, REST API Integration).
- Leadership:** International Service Director, Rotaract Club of Coimbatore Cosmopolitan; International Football Player, ICOJ; sales experience at a family business; speaks English, Hindi, Tamil, and Gujarati.
