

Faiz Ishak Jamal

faizjamal1306@gmail.com | +91 63803 33437 | LinkedIn | GitHub | Portfolio

Professional Summary

Aspiring Software Engineer and Generative AI Developer with strong foundations in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and scalable backend systems. Experienced in designing AI-powered pipelines, REST APIs, and full-stack web applications using modern cloud technologies. Passionate about building intelligent systems, distributed applications, and production-ready AI products.

Education

Bachelor of Technology in Computer Science Engineering

Sri Ramakrishna Engineering College, Coimbatore

Higher Secondary Education (CBSE)

Stanee School, Coimbatore

Technical Skills

Programming: Python, C++, Java, JavaScript

AI & Machine Learning: Large Language Models (LLMs), Transformer Architecture, Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Tokenization

Frameworks: LangChain, LangGraph, LlamaIndex, PyTorch, Scikit-learn, XGBoost

Backend Development: FastAPI, Express.js, REST API Development, Microservices Architecture

Databases: MongoDB, PostgreSQL, Vector Databases, SQL

Cloud & DevOps: Oracle Cloud Infrastructure (OCI), AWS Fundamentals, Git, GitHub, CI/CD Basics

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, System Design Basics, Debugging, Database Design

Projects

ClipForge AI — AI Podcast Clipping System

GitHub Repository

LangGraph, LangChain, FastAPI, Next.js, PostgreSQL, Redis

- Building an AI-powered podcast clipping system that identifies viral 40–60 second segments and generates automated editing blueprints.
- Designed an agentic AI workflow using LangGraph for pipeline orchestration and LangChain for LLM interaction.
- Implemented a FastAPI backend exposing REST APIs for transcript processing and clip generation tasks.
- Architected backend integration with PostgreSQL for persistent storage and Redis caching for task state management.
- Developed modular AI agents for clip discovery, validation, and editing plan generation.

Wanderlust — Airbnb Clone

GitHub Repository

Node.js, Express.js, MongoDB, EJS, Passport.js, Cloudinary, MapTiler

- Developed a full-stack travel listing platform with CRUD functionality for listings and reviews.
- Implemented authentication and authorization using Passport.js with MongoDB-backed session storage.
- Integrated Cloudinary and Multer for scalable image upload and management.
- Built location-based listing visualization using MapTiler geocoding and interactive maps.
- Applied MVC architecture with modular routing, controllers, and middleware.
- Implemented validation using Joi and centralized Express error handling.

PreMediq — ML-Based Health Premium Predictor

GitHub Repository

Python, Scikit-learn, XGBoost, Streamlit

- Developed machine learning models using XGBoost and Scikit-learn to predict insurance premiums from structured datasets.
- Performed data preprocessing, feature engineering, and exploratory data analysis.
- Built a Streamlit interface for real-time model predictions.

Internships

Software Development Intern — Benchmarrk

Dec 2025

- Designed backend services and database schemas for scalable systems.
- Integrated REST APIs and improved modular backend architecture.
- Used Git-based version control and collaborative development workflows.

Full Stack Development Intern — Nexoris Solutions

Sep 2025 – Oct 2025

- Developed authentication systems and backend routes using MVC architecture.
- Built production-style applications following clean code and modular design practices.

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
AWS Cloud Practitioner Essentials

Research & Hackathons

Research Paper: Human Emotion Identification Using Brain Waves and Facial Images — ETMIS 2025
OpenAI Academy × NxtWave Regional Buildathon — Prefinalist
Mumbai Hacks 2025 — Finalist (GenAI Hackathon)

Leadership & Achievements

International Service Director — Rotaract Club of Coimbatore Cosmopolitan
International Football Player — ICOJ
2nd Place — SREC Coin Design Challenge 6.0
3rd Place — SREC AI Vishwaguru

Soft Skills

Problem Solving
Analytical Thinking
Technical Communication
Cross-functional Collaboration
Adaptability and Continuous Learning

Languages

English, Hindi, Tamil, Gujarati

Interests

Football, Strength Training, Art
